

TurningPoint for Mac Release Notes

Software Name: TurningPoint for Mac
Release Date: 08-27-2009
Version: 1.2.3
Support: support@turningtechnologies.com
Languages: English
Overview:

Minimum System Requirements:

- G3-class processor or better
- Mac OS X 10.3 or higher
- 256 MB RAM (512 MB recommended)
- 30 MB hard disk space
- Microsoft Office 2004 (Full install) for Mac
- Available USB 1.1 or USB 2.0 port

1.2.3

Known Issues:

- If you are polling an audience for responses and someone attempts to respond with an NXT (either using a Legacy 2.4, HID 2.4, or HID 4.6), any responses sent after the NXTs attempt to respond will not be received by TurningPoint. Unplugging and reseating the receiver will allow responses again.

Fixes:

Fixed WebCT log in credentials issue.

1.2.2

Enhancements:

- Added Single Source login for LMS integrations
- Added support for RF2 receivers

Fixes:

Fixed minor issues with LMS components
