

Long Range Receiver

Our Long Range (LR) Receiver is ideal for large venues including exhibition halls, conference centres and auditoriums. Employing radio frequency technology, the LR Receiver will collect responses from up to 1,000 ResponseCards within a range of 120m (240m coverage). The LR Receiver easily, instantly and accurately collects responses for interactive presentations. For use with all RF ResponseCards (RF, RF LCD, XR and NXT).
