

TurningPoint
AnyWhere™

Poll in ANY Mac Application

We understand that not everyone is using PowerPoint® during presentations. Some speakers use Keynote® presentations, Word® documents, Excel® spreadsheets, PDF content, and web pages to relay vital information. It's a good thing that TurningPoint AnyWhere can poll in ANY Mac application using a floating toolbar, and still generate reports for further analysis!

Key Features Include:

- Floating Toolbar - place it anywhere on your screen, poll and collect data instantly
- Dynamic Charting - will appear in new window and update in real-time with results
- Reporting Function - detailed reports in programs outside of Office suite
- Question List - create, load and edit question list for advanced polling preparation
- Custom Questions - create questions on-the-fly and insert into session as needed
- Participant List - track individual results, gauge participant assessment instantly
- Screen Shot Report - captures questions, results and screen shot of each question
- Real-Time Registration - using participant list, have audience register devices
- Anonymous Polling - start polling anonymously anytime under main menu
- Countdown Timer - countdown to close polling, add, subtract or pause time instantly
- Response/Non Response Grid - see who has and who hasn't responded in real-time
- No Software Installation Required - easily launch from a flash drive or CD, no hassle
- Competition and Team Functions - add fun and excitement to presentations

Technical Requirements:

- Requires RF or IR Receiver or active ResponseWare™ account
- G3-class processor or better
- Mac OS X 10.4 or higher
- 256 MB RAM (512 MB recommended)
- 10 MB hard disk space
- Available USB 1.1 or USB 2.0 port
- Ethernet or 802.11 compatible wireless network card (required if ResponseWare is used)
