

Make your presentations come alive with

INTERACTIVE WHITEBOARD

Transform your existing whiteboard into an interactive workspace!

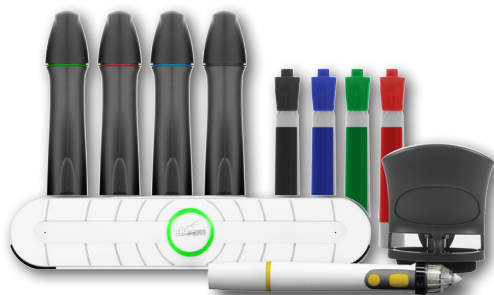

Introducing **eBeam** edge

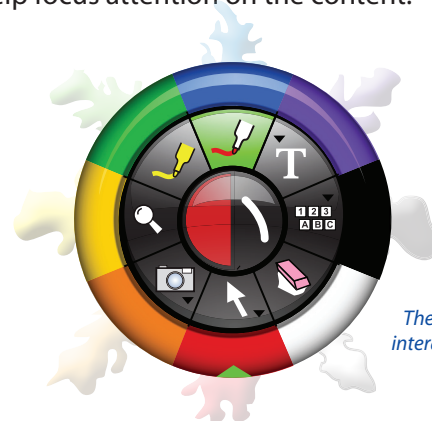

Edge for Business

elevate engagement with interactive content

- >> Lightweight, portable and adaptable - the eBeam Edge Interactive Whiteboard transforms any flat hard surface into a powerful interactive workspace - up to a massive 2.7m interactive area.
- >> Place eBeam on a traditional or glass whiteboard, walls and even tabletops to promote collaboration and expression. It can be set-up in seconds and allows you to draw in freehand using vibrant colours, annotate over any open application and use productivity tools that help focus attention on the content.

eBeam Edge for Education Complete

The intuitive eBeam interactive tool palette

- >> The eBeam Edge works with all data projectors. It comes with a lightweight stylus and powerful yet easy to learn and use interactive software.
- >> The eBeam Complete model provides both Projection and Whiteboard modes for added IWB functionality. Use virtual ink in 'Projection' mode or regular marker pen ink in 'Whiteboard' mode.
- >> Save all your content including screen annotations and drawings, then share them over the web with anyone in the world via 'BoardCasting'.

Yes, all this standard - right out of the box!

About eBeam Edge

Using the eBeam software, mark up content projected from a computer and bring presentations, documents and web pages to life. Digitally capture handwritten notes and easily distribute or retrieve them later. eBeam offers powerful annotation tools, record & playback, multiple file formats, handwriting recognition (education models) and scrapbook / workspace functionality.

The eBeam Edge system includes a sleek receiver with lightning-fast response time and pixel-perfect precision. It works with the ergonomic eBeam stylus, designed for natural and comfortable writing, drawing and computer navigation. The optional eBeam LiveWire adaptor with built-in software and memory storage allows any PC to operate the eBeam system without installing special software.

eBeam Edge Modes

Glass whiteboard image depicted

eBeam Projection

creates an interactive whiteboard wherever you go. eBeam Projection works with your digital projector and any standard whiteboard to create an interactive workspace where you can easily present, collaborate and build content.

eBeam Whiteboard

allows you to capture dry erase notes from any standard whiteboard; transforming it into a digital copyboard that lets you save, print, or easily share your whiteboard notes with anyone in the world.

eBeam Complete

Projection + Whiteboard
is the perfect combination of a fully featured interactive whiteboard and a next-generation digital copyboard. The receiver is powerful and compact, and is portable enough to carry in a laptop case, or even a coat pocket.
