

NO STUDENT LEFT BEHIND

WITH THE
TurningPoint
STUDENT RESPONSE SYSTEM

Ensuring all students are following a lesson can be difficult. With the TurningPoint Student Response System teachers can be confident of achieving 100% engagement and participation - even from the quietest student. Individual feedback allows teachers to better direct students' learning development and make sure they achieve national standards.

With the TurningPoint Student Response System suite, you can connect students, classrooms and schools anywhere in the world. Students can use their TurningPoint infra-red and radio frequency keypads, their internet enabled mobile phones or their netbooks and connect to any interactive session, anywhere, at any time.

“Join a Japanese class in Australia with an English class in Japan!”
